

How to simply print contents of list?

$L \rightarrow \text{next}$

~~$L \rightarrow \text{next}$~~

$(*L \rightarrow \text{next}).\text{data} \equiv L \rightarrow \text{next} \rightarrow \text{data}$

$(*p).\text{data} \equiv p \rightarrow \text{data}$
 "dereference followed by dot
 \equiv arrow"

$\text{node} * p = L;$

while ($p \neq \text{NULL}$) { // while p not
 // at end of list
 cout << $p \rightarrow \text{data}$ << " ";
 $p = p \rightarrow \text{next};$

}

cout << "\n";

// $L \equiv \text{begin}()$

// $\text{NULL} \equiv \text{end}()$

How to remove a node from the beginning of a list?

$\text{node} * p = L;$ // ①

$L = L \rightarrow \text{next};$ // ②

$\text{delete } p;$ // ③

(Watch out for empty list...)

Exercise: how to clear entire list.
